

Now have Access to School of Business Computer programs, anywhere, from your personal Computer!

What is a Citrix FSB Virtual Remote Desktop?

Citrix FSB Virtual Remote Desktop allow multiple users to access a remote computer as if they were using the machine locally in the lab. FSB students who cannot access lab resources due to the lab being full or need to run FSB applications, can now have full access to the applications needed to complete course work from their personal computers. You will use this machine just like you would use a lab machine.

Citrix FSB Virtual Remote desktop allows the applications to pass screen shots and files between your local computer and the Virtual Remote Desktop.

**Note: All off-campus connections will require installation and use of Miami's VPN Client.
See bottom notes.**

Accessing the Farmer School of Business Citrix FSB Virtual Remote Desktop:

1. In your web browser, type in: <http://citrix.fsb.miamioh.edu>
Log in with your Miami username and password. The first time you visit the site, you'll see a box that reads "Click Install to access your applications." Make sure the Citrix license agreement is checked then click Install.
 - Windows users: The installer may prompt you to run or save. Select Run. Once the client is downloaded, you may be prompted with a security warning. If so, select Run.
 - Mac users: You will need to install the Citrix Receiver manually after downloading. Go to your downloads and select the Citrix dmg file. Select Install Citrix Receiver.pkg and the following the directions.
2. If a box reads, "Confirm installation is complete" click ok. Depending on your browser, you may see a message that reads "A website wants to open web content using this program on your computer." If you see this then click the box option "Do not show me the warning for this program again". Now click allow.
3. Once connected, another window will open which will connect you to your FSB Virtual Desktop.
4. Your screen should now look similar to what you would see in the FSB lab.

Notes:

1. Copy all work files back to your local computer or M: drive before logging out. Don't plan on keeping anything saved in My Documents on the Virtual Desktop. All files will be deleted from this folder upon logging out.
2. If accessing from **off-campus** then you will need to install and run the VPN client or access will be denied. This can be obtained from:

- VPN install instructions: <http://kb.muohio.edu> and search 25985
 - Using VPN instructions: <http://kb.muohio.edu> and search 54955
3. **Need Help?** Please email fsbhelp@miamioh.edu or stop by FSB IT in FSB 2036 for assistance
